

Enhanced structure data distribution

Customer Committee

24.11.2020

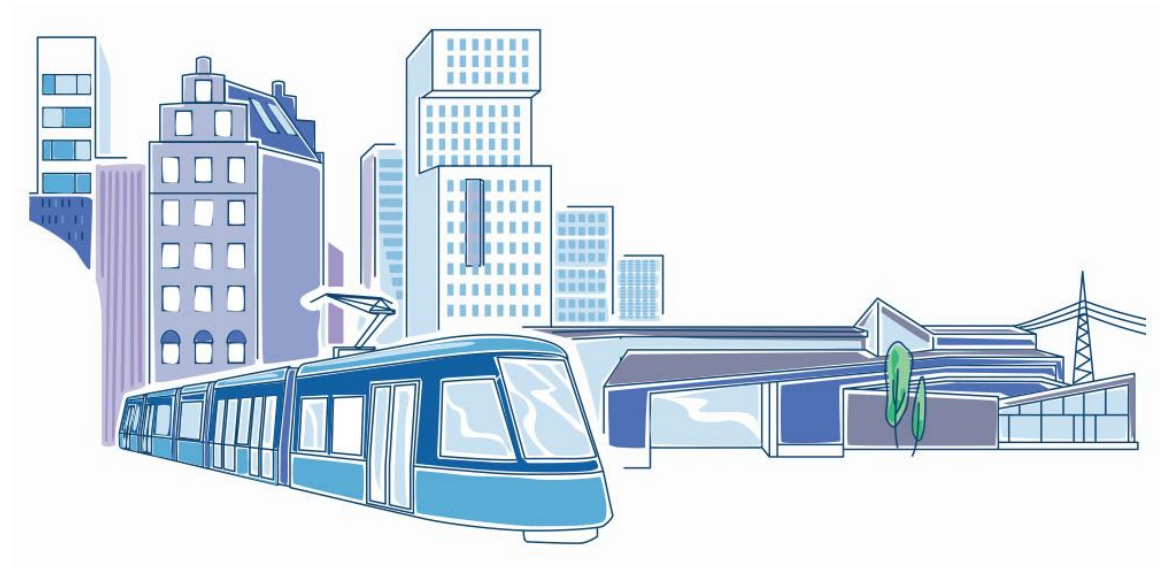

General

- On the previous Customer Committee meeting there was a presentation “Request for enhanced structure data distribution”
- Based on the discussions and comments with the TSOs and some market participants, eSett has a proposal for consumption structure improvement
- The proposal is two new structural Data Packages for BRPs:
 - Consumption MEC (Active)
 - Consumption MEC (Delta)

Consumption MEC (Active)

- Receiver: BRP
- Description: BRP's Consumption MECs which are valid sometime within the configured period. Data package is populated with Consumption MEC validities as they are currently in Basse.
- Time period: From D to D+14 (where D is today)
- Time trigger: Daily Basis
- Related MEC information in the Data Package:
 - Valid From
 - Valid To
 - MEC ID
 - RE code
 - MGA code
 - Consumption Type
 - Measurement Type

Consumption MEC (Delta)

- Receiver: BRP
- Description: BRP's Consumption MECs which are starting or ending within the configured period. Data package is populated with Consumption MEC validities as they are currently in Basse.
- Time period: From D-14 to D+14 (where D is today)
- Time trigger: Daily Basis
- Related MEC information in the Data Package:
 - Valid From
 - Valid To
 - MEC ID
 - RE code
 - MGA code
 - Consumption Type
 - Measurement Type

WE SETTLE, TOGETHER!
