

# eSett News

Customer Committee meeting May 2023

Diana Welander, eSett Oy

# Annual review 2022

eSett's Annual review 2022 was published in March.

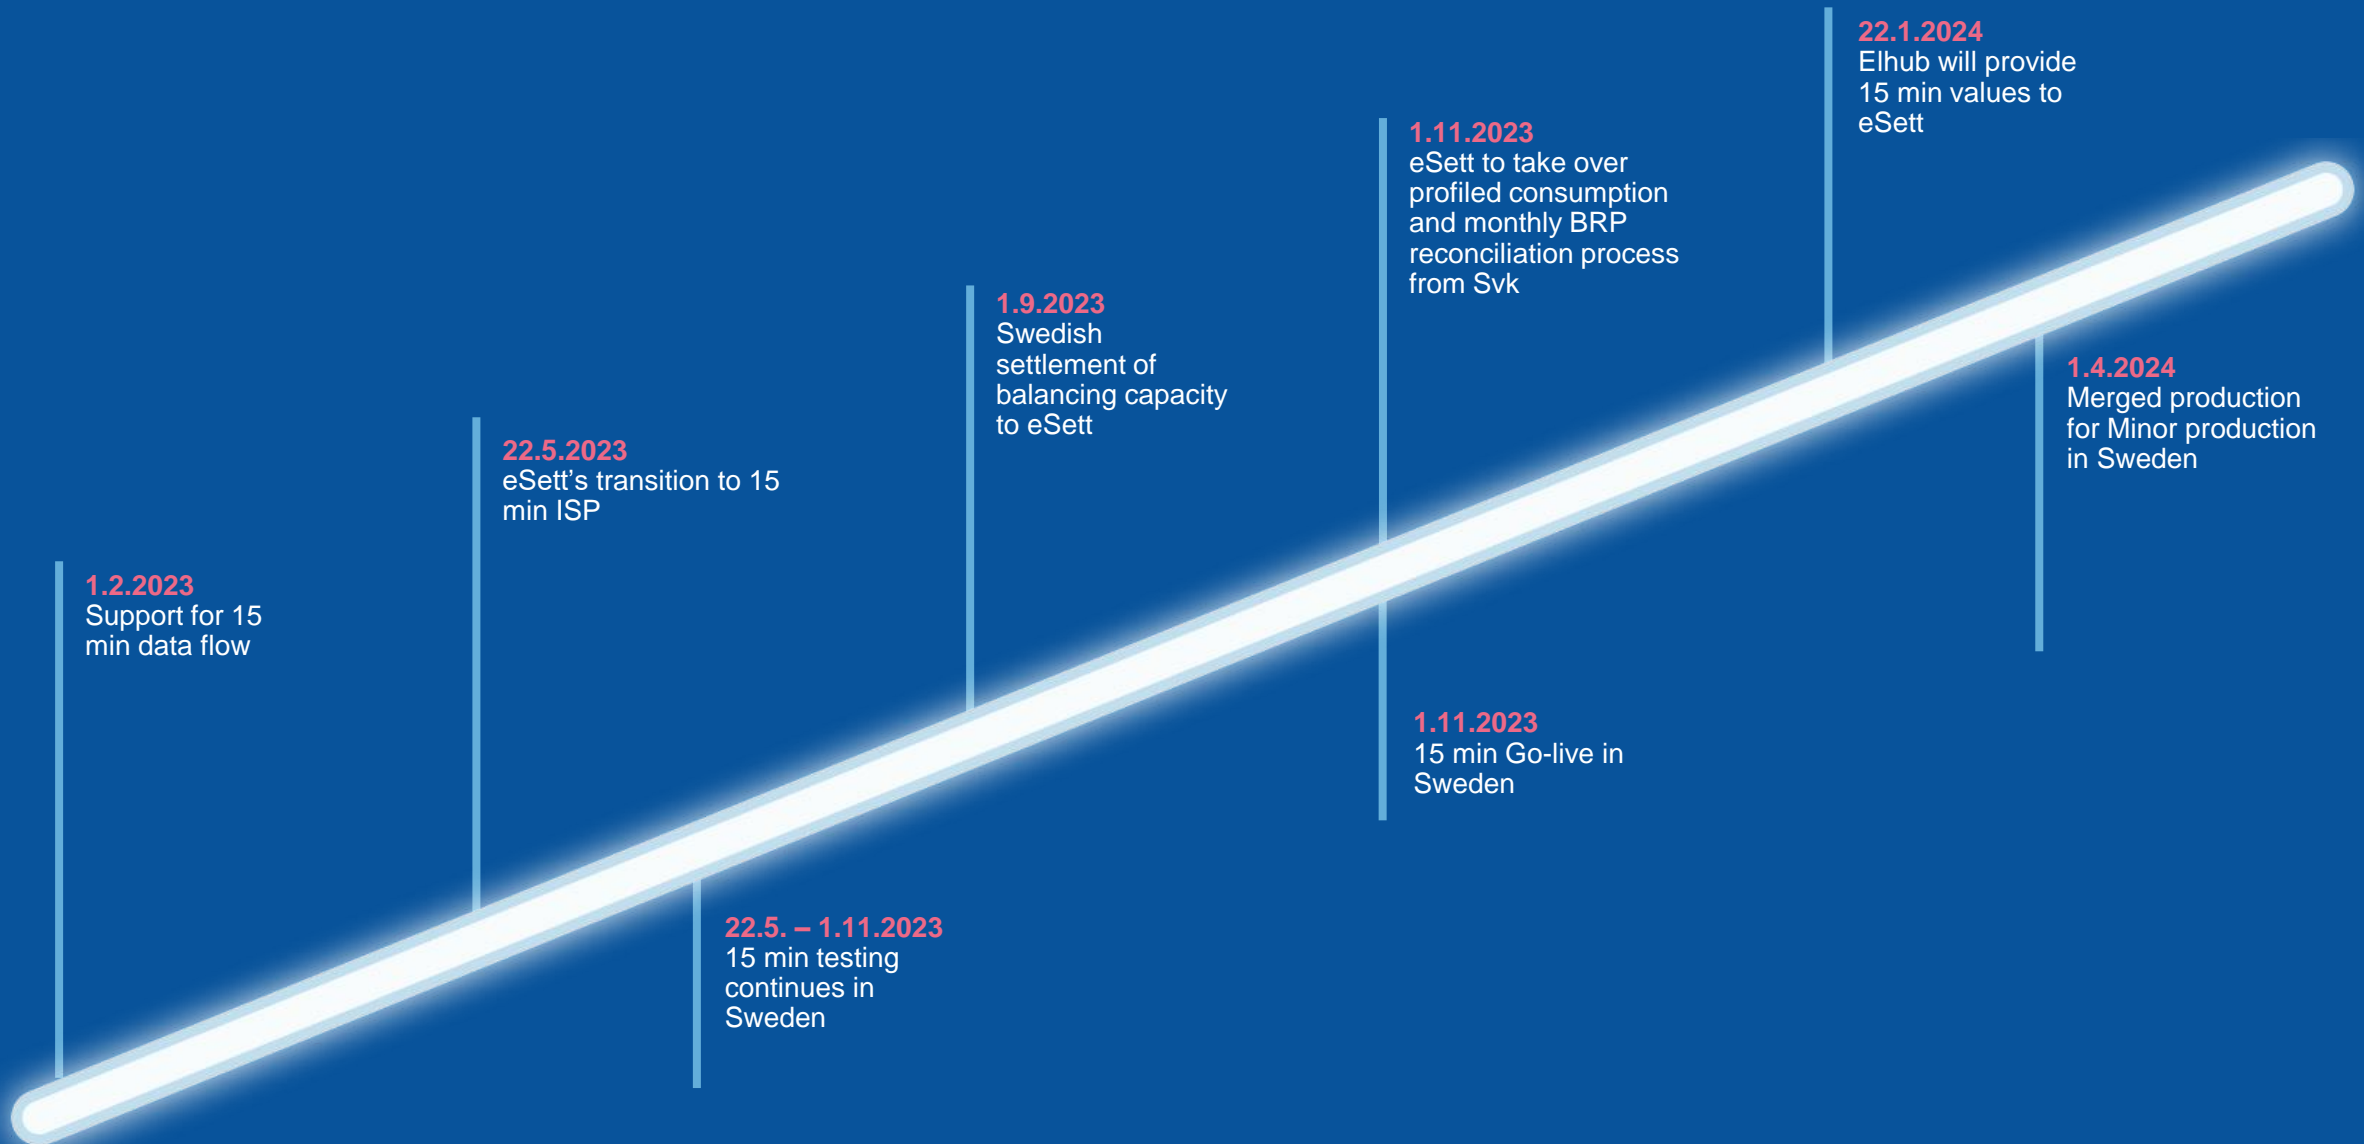

Click [here](#) to read about the highlights, biggest changes, and finished projects of the past year.

# Account model

- Applied for Nordea Finland, Nordea Norway and a new settlement bank Nykredit
- Go-live planning with SEB
- DNB Norway is positive about the change, currently going through the agreements
- Danske Bank is considering the new account model
- OP, Spare banken and Jyske Bank don't want to apply the new model

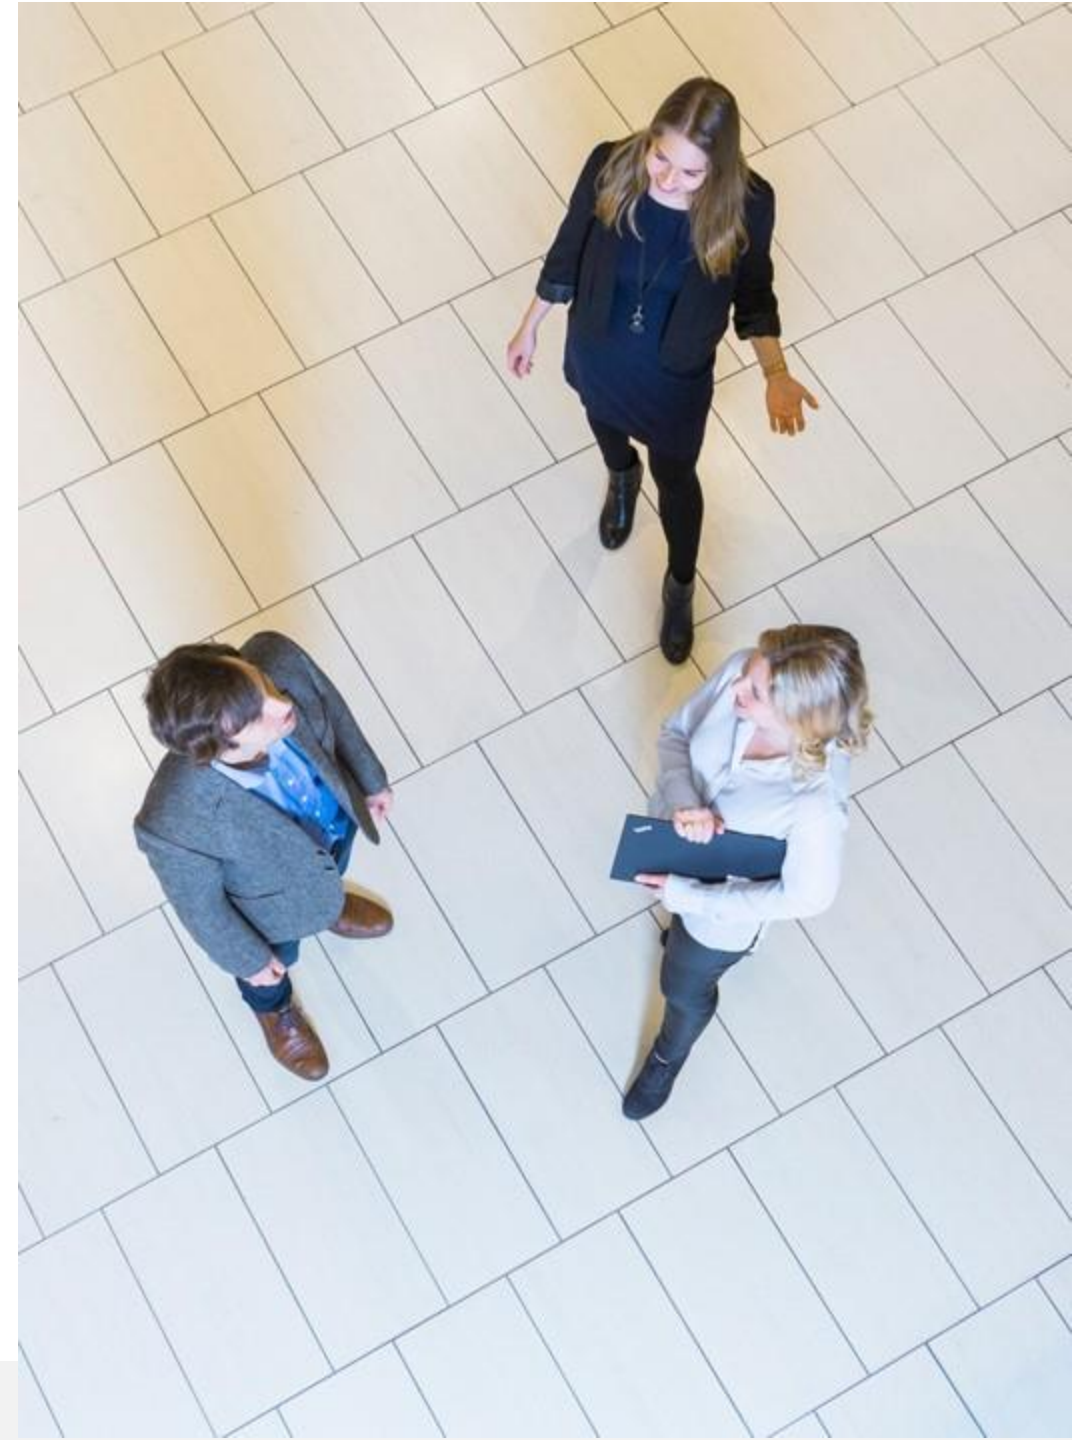

# Swedish settlement of balancing capacity to eSett

- Target go-live in 1.9.2023
- Progress
  - Project site and commissioning plan (eSett)
  - Market communication (eSett/Svk)
  - Renewal of Swedish Balance agreements (Svk)
    - Only applied for new parties
  - New product codes for data exchange (NMEG/Svk)
    - FRR-A, correction
    - FRR-M, correction
  - Development and implementation (eSett)
- Tasks to be done:
  - Development and implementation (Fifty)
    - Ongoing
  - Internal testing (eSett)
    - Ongoing
  - External testing (Svk)

# BRP profiled consumption and reconciliation from Svk to eSett

- Aim: eSett to take over profiled consumption and monthly BRP reconciliation process from Svk
- Timeline: switch to eSett from **01.11.2023**
- Progress
  - Project site and commissioning plan (eSett)
  - Market communication (eSett/Svk)
  - Development and implementation (eSett)
- Tasks to be done:
  - Development and implementation (market parties)
  - Internal testing (eSett)
    - Ongoing
  - External testing (eSett/DSOs/BRPs)
    - Planned for July-September in combination with 15 min ISP tests

# Merged production in Sweden

- The planned go-live date for all market participants in Sweden is on 1.4.2024
- Merged production should be taken into use for units under 1 MW.
- Minor production would be introduced in Sweden for everything under 1 MW at the same time
  - All merged production = minor production.
- Progress
  - Communication started
- To be done:
  - Create project page on eset.com
  - External testing from December 2023 (market)

# Recently made improvements

## **Layout optimization in Online Service**

Online Service will be scaled to fit on wider screens in order to display the data with improved user experience

## **Exchange rates data packages**

Two new data packages containing exchange rates will be available for subscription in the Online Service Data Packages Management view for BRPs.

## **Rows displaying total values will be added to drill-down views in Online Service**

Online Service will be updated to display the 'Min', 'Max' and 'Total' values also in remaining drill-down views that don't currently show total values. The change covers both the Imbalance view for BRP users and MGA imbalance view for DSO users.

## **New overview for showing MGA imbalances in Online Service for DSOs and Datahubs**

DSOs and Datahubs will be able to see an overview of their MGA imbalances that exceed a certain pre-selected limit. This view will display all MGAs per MBA, and the number of imbalance settlement periods where the MGA Imbalance quantity exceeds the pre-selected threshold. Thresholds that may be selected are 0,001; 0,01; 0,1 and 1 MWh. Also, drill-down to MGA Imbalance will be possible by clicking on the MGA name.

# Possible upcoming improvements

## Updated reporting logic for Service Providers

More logical and helps especially when market participant changes SP

## Notification of a Bilateral Trade change

The counterparty BRP will receive a notification in case a Bilateral Trade MEC changes due to a change in Retailer balance responsibility (RBR).

## Notification Widget

A new notifications widget will be added to the Online Service Dashboard.

## Improving the Data package overview

The Data package overview in Online Service will be updated to give more information about the Data packages as i.e. document standard, sending times and a description of the data package.

# Possible upcoming improvements

## **Update in the ONLS Prices view**

instead of showing one price at the time side by side, multiple prices can be displayed in different columns, and the period would always be in the first column.

## **Select all filter in Online Service**

Implementation of a "Select All" feature into multi-choice filters in Online Service.

## **Updates to the Balance report in Online Service**

New MBA & RE filtering and new columns to Balance report in Online Service.

## **New e-mail notification when invoices have been published**

A new e-mail notification when the invoices have been published.

# NBS Handbook

- Handbook 4.3 was updated in April
  - More visual presentation of KPI calculations
  - Only minor fixes and clarifications
- Questions to the Customer Committee:
  - Do you use the NBS Handbook?
  - In what language do you read the NBS Handbook?
  - Feedback on the NBS Handbook
    - Is something missing? Is there unnecessary information? Is the Handbook clear and understandable?

WE SETTLE, TOGETHER!
